

Perfecting Water. Protecting Life.™

Kinetico HYDRO® ECO™

Tankless Reverse Osmosis System

**CLEANER* WATER.
ON DEMAND.**

A SMARTER WAY TO STAY REFRESHED AND HYDRATED

- Tankless, on-demand water
- Water-saving, 2:1 efficiency
- Smart alerts & LED feedback
- Smaller, space-saving design

Perfecting Water. Protecting Life.™

What Makes the Kinetico HYDRO® ECO™ Tankless Reverse Osmosis System Different?

Certified to significantly reduce lead, arsenic, chlorine, chromium, copper, fluoride, TDS, mercury, pharmaceuticals, and heavy metals while improving the taste, smell and appearance of your water.

LED System Indicator Lights: Real-time system feedback through LED indicators on the system and faucet—providing clear status updates and filter replacement reminders.

Built-in Leak Detection: Proactive monitoring with audible alerts and LED notifications—helping detect leaks early and protect against potential water damage.

Long-Lasting Filters: The combined Pre/Post Filter cartridge treats 950 gallons while the Reverse Osmosis cartridge treats 1900 gallons before replacement.

Compact Size: Up to 75% smaller footprint than traditional tank-based systems—fits easily in compact, under-sink spaces with a clean, modern installation.

Quiet Design: Minimal noise or vibration when in use.

Easy Filter Changes: Takes less than a minute per filter, with no spills or mess.

Lead-Free Faucet: Available in chrome, brushed stainless, and matte black.

Efficient Operation: Delivers up to a 2:1 pure-to-drain ratio—recovering more water per gallon filtered to reduce waste without compromising performance.

Two-Year Warranty: Dependability, peace of mind.

Certified Better Water: The HYDRO® ECO™ system is WQA Certified, delivering independently verified performance for cleaner, better-tasting water.
